Product Highlights

Small, compact Linux computers are perfect for quick and easy hat rail installation. High-power controller solutions offer a wide range of interfaces and flexible expansion options. Automation Line AL i.MX6 ULL features I/O ports with industrial-use spring terminals, 24 V DC power supply and a CAN Bus expansion interface. Our cost-optimized hat rail computers with

guaranteed long-term availability are designed with your automation and IoT solutions in mind.

Do you need additional inputs and outputs for your control solution? Our hat rail computers can easily be expanded via our multi-purpose I/O module, with communication via a CAN interface, giving you a versatile and compact all-in-one solution.

Client Benefits

- Small, compact design
- Flexible top-hat rail assembly
- Optional expansion via multifunctional I/O module
- Excellent price/performance ratio

Applications

- Automation
- IoT Gateways
- Edge Computing
- Communication
- Mechanical Engineering

About Kontron

Kontron AG is a leading IoT technology company. For more than 20 years, Kontron has been supporting companies from a wide range of industries to achieve their business goals with intelligent solutions. From automated industrial operations, smarter and safer transport to advanced communications, connectivity, medical, and energy solutions, the company delivers technologies that add value for its customers. With the acquisition of Katek SE in early 2024, Kontron significantly strengthens its portfolio with the new GreenTec division, focusing on solar energy and eMobility, and grows to around 8,000 employees in over 20 countries worldwide. Kontron is listed on the SDAX® and TecDAX® of the German Stock Exchange.
